## Description of necessary first-aid measures

General advice In case of accident or if you feel unwell, seek medical advice IMMEDIATELY.

(Show the product label where possible)

If inhaled Remove victim from exposure to well-ventilated area. If breathing is

labored, qualified personnel should administer oxygen. Apply artificial respiration if breathing has ceased or shows signs of failing. Call a Physician.

In case of skin contact Remove contaminated clothing. Immediately wash affected areas

thoroughly with soap and water. If irritation, redness, or a burning sensation develops and persists, obtain medical advice. Contaminated clothing should

be thoroughly cleaned before reuse.

In case of eye contact Immediately flush eyes running water for a minimum of 15 minutes. Hold

eyelids open during flushing. If irritation persists, repeat flushing. Obtain

medical attention IMMEDIATELY.

If swallowed Do NOT induce vomiting. Provided the patient is conscious, wash out

mouth with water then give 1 or 2 glasses of water to drink. This material can enter lungs during swallowing or vomiting and cause lung inflammation and damage. Refer person to medical personnel for immediate attention.

#### **SECTION 6: Accidental release measures**

## Personal precautions, protective equipment and emergency procedures

Remove all sources of ignition. Ventilate area.

## **Environmental precautions**

In case of large spill, dike the area to prevent this material from entering water systems or sewers.

## Methods and materials for containment and cleaning up

Absorb spill with an absorbent material such as sawdust, vermiculite or sand, and place in a closed container.

# **SECTION 7: Handling and storage**

#### Appropriate engineering controls

Provide sufficient mechanical (general and/or local exhaust) ventilation to maintain exposure below TLV (s). General ventilation is recommended. Additional local exhaust ventilation is recommended where vapors, mists, or aerosols may be released. For guidance on engineering control measures refer to publications such as the ACGIH current edition of "Industrial Ventilation, a manual of Recommended Practice."

#### Individual protection measures, such as personal protective equipment (PPE)

### Eye/face protection

Chemical splash goggles in compliance with OSHA regulations are advised. However, OSHA regulations also permit other types of safety glasses. (Consult your safety equipment supplier)

## Skin protection

Wear protective clothing to prevent skin contact. Keep exposed skin area to a minimum. Protective clothing should be selected and used in accordance with "Guidelines for the Selection of Chemical Protective Clothing" published by ACGIH. Eye wash station and safety shower should be available.

#### **Body protection**

Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place., The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

#### Respiratory protection

This product has demonstrated no observable effects at room temperature; however, it is highly recommended that an air-purifying respirator with organic filter cartridges be worn. In addition, in any interior, confined space, spray application, a supplied air source must be provided. When the product is sprayed or heated without adequate ventilation, an approved MSHA/NIOSH positive-pressure, supplied-air respirator may be required. Air purifying

respirators equipped with organic vapor cartridges and a Hepa (P100) particulate filter may be used under certain conditions when a cartridge change-out schedule has been developed in accordance with the OSHA preparatory protection standard (29 CFR. 1910.134).

## **Environmental exposure controls**

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.
